About ASR International Corporation

- ◆ Incorporated in 1986. www.asrintl.com World headquarters in Hauppauge, Long Island, USA
- ◆ **Global infrastructure** to provide **Best Value Technical Support Services**
- ◆ **ASR is a Small Disadvantaged Business and pursues teaming with other SDBs/LBs where possible.** We have teamed up with a **Women Owned Small Business** and are working on multiple contracts with them.
- ◆ Full range of Technical Support Services to Fortune 500 Companies, Prime Contractors and Government Agencies **in all the 50 states of USA** & 40 countries
- ◆ **Top quality ratings - ISO 9001:2008 company; assessed at SEI CMMI Level 3**
- ◆ National Award for “Business Excellence”. **Exceptional Rating in CPARS**
- ◆ Congressional recognition for accomplishments in support of Homeland Defense through Surface Deployment and Distribution Command (DoD-SDDC)
- ◆ **Extensive experience in Government and Commercial projects** – Administrative and Clerical, Project Management, Engineering, Information Technology, Healthcare Administration, Training, Quality Assurance / Control, Health Facility Planning, Supply Chain Management, Warehousing Management.

ASR Value-Add

- ◆ One stop provider of Worldwide Technical Support Services
- ◆ Since 1986, track record of outstanding service delivery to Government and Commercial customers
- ◆ **Business Model:** ASR's field team members provide technical support services all over USA and 40 countries with proven processes / systems incorporating over 30 years of experience and domain knowledge in Project / Program Management.
- ◆ **Certifications:** ISO certified, by DNV, since 2001. ASR Quality Management System (QMS) complies with ISO 9001:2008, ISO 14001, OHSAS 18001
- ◆ Cost-effective: We train, mentor, manage, monitor our team to ensure delivery of on-time, high quality best-value services as per PWS requirements
- ◆ **Systems:** ASR uses web-enabled, ASR Project Tracking System (PTS) for Project Management / Coordination / Operations, Resource Identification / Location, Tracking / Reporting. Its usefulness proven / acknowledged on ASR's service delivery to Government and commercial customers
- ◆ **Experienced in Service Contract Act compliance**
- ◆ **We deploy veterans on our assignments where practicable.**

ASR – ISO Certification

DNV audits of ASR's QMS from 2009 to 2016 had no nonconformities. **Positive indications** identified by the DNV Auditor:

- 2015**
 - ◆ ASR has **excellent metrics** in place to measure all processes,
 - ◆ ASR has a **well-trained mature workforce** as well as an effective QMS,
 - ◆ Top Management holds periodic meetings with all personnel,
- 2014**
 - ◆ ASR has **mature processes** in place and **experienced personnel**,
 - ◆ The company has numerous **training** documents for employees,
 - ◆ On time delivery is at 97.3%,
- 2013**
 - ◆ Surveys indicate that customers have a **positive perception** of ASR's overall performance,
 - ◆ The **Project Tracking System (PTS)** is a computer tracking system for storing and tracking all pertinent company and client data,
 - ◆ ASR's intranet contains a wealth of **technical training** information,
- 2012**
 - ◆ Dunn & Bradstreet surveys indicate customers have positive perception of ASR's quality performance (85% positive response rate),
 - ◆ ASR has implemented **training** documents for field employees such as Destructive Examination Training, GTAW Process and Inspection Training, Codes, Standards and Specification Training,
- 2011**
 - ◆ ASR has a **strong commitment to quality**. In addition to ISO 9001:2008, the company voluntarily measures their quality systems using **ISO 14001, OHSAS 18001** and CMMI Level 3 as guidelines,
- 2010**
 - ◆ Customer Surveys indicate **positive perception** of ASR's quality performance,
 - ◆ ASR strives for **process improvements** and uses **lesson learned** as an improvement tool,

ASR QMS has been ISO certified since Nov 2001.

- ◆ Rowan
- ◆ ICIM

ASR's Success Factors

- ◆ A highly qualified team performing support services,
- ◆ Pre-screened and security cleared personnel deployed on the contract,
- ◆ Compliance with Federal Acquisition Regulation Clauses,
- ◆ Provide Training & Orientation to the team on a periodic basis,
- ◆ Consistent record of ASR's employees on the contract taken over by the government,
- ◆ ASR database has qualified and DoD security cleared personnel within 30 miles radius of customer locations.
- ◆ Effective flow-down of Corporate plans, and processes,
- ◆ Quick resolution of contract issues; and share Lessons Learned across all contracts to prevent future recurrences,
- ◆ Timely submission of all deliverables including Monthly Progress Reports,
- ◆ Work safely at all times, and ensure all employees are aware of safe working practices,
- ◆ Follow Government Site Lead instructions, maintaining compliance with PWS,
- ◆ Ensure Best Practices are followed across all contracts,
- ◆ Monitor employee performance to ensure compliance with Government instructions at all times,
- ◆ Current GSA Schedules (IT, PSS), Global Business Support (Area I, II, III, IV), and SeaPort-e contracts,
- ◆ Proven Performance Record of "EXCEPTIONAL" services on CPARS.

Administrative and Clerical Support Services

ASR offers complete range of **Administrative and Clerical Support Services** including:

Administrative and Clerical Services

- ◆ Administrative Assistant
- ◆ Call Center Representative
- ◆ Customer Service Representative
- ◆ Data Entry
- ◆ Executive Assistant
- ◆ File Clerk
- ◆ General Office Clerk
- ◆ Receptionist
- ◆ Convention Representative
- ◆ Switchboard Operator
- ◆ Sales Representative
- ◆ Word Processor
- ◆ Human Resource Management
- ◆ Personnel Assistant
- ◆ Education Support
- ◆ Office Management
- ◆ Help Desk Support
- ◆ Secretarial Support
- ◆ FOIA Support
- ◆ Documentation and Record Management
- ◆ Library Services
- ◆ Mail Management
- ◆ Scheduling and Coordinating Meetings
- ◆ Handling phone calls
- ◆ Travel Arrangements
- ◆ Personnel Support
- ◆ Acquisitions Support
- ◆ Generate ERP Documents
- ◆ Accounts Clerk
- ◆ Benefits Specialist
- ◆ Bookkeeping
- ◆ Specialized Services

Financial Support Services

ASR offers complete range of **Financial** Support Services including:

Financial Support Services

- ◆ Cost Estimation
- ◆ Financial Analysis
- ◆ Asset Management
- ◆ Accounting
- ◆ Asset visibility
- ◆ Auditing Services
- ◆ Business Performance Analysis
- ◆ Documentation and Reporting
- ◆ Payroll, Medical Billing and Grants
- ◆ Acquisition Support
- ◆ Training
- ◆ Funds Management
- ◆ Develop Policies and Practices
- ◆ Risk Minimization Solutions
- ◆ Regulatory Compliance
- ◆ Financial Procedure Management

ASR Training Examples

Health, Safety, Security, and Environment (HSSE) Awareness

Provides an overview of the ASR HSE policy and guidelines and tips for workplace safety and security.

Workplace Safety

Work and environmental safety depend not only on technically sound equipment, plant and robust processes but more importantly on competent team members well versed in safety and security culture. **No work activity is so important that it cannot be done in a safe manner.** ASR has developed the following guidelines for workplace safety:

- ♦ All ASR Team members are required to obey safety rules and exercise caution in all work activities, at all times,
- ♦ Team members working at the work site must follow all the applicable safety, security, health and environmental rules, procedures and guidelines,
- ♦ As an ASR Team member, it is important that you are an advocate for safety / security. Your ability to impress other ASR Team members and colleagues with the importance of working safely will help us to keep the workplace accident-free,
- ♦ Every ASR Team member is encouraged to identify and minimize HSSE (Health, Safety, Security and Environment) risks and unsafe conditions and initiate steps to eliminate them to the extent practicable,
- ♦ Team members are expected to fully comply with all the applicable federal, national, state / provincial, local statutes, regulations and guidelines and take all precautions to prevent harm to personnel or damage to the environment, property, ASR or customer's reputation.

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without written authorization from ASR.

3

Workplace Safety – Cont'd

- ♦ Some work sites have barricades to identify areas of hazard and warn everyone of the hazard. All ASR employees must respect barricades and not cross the barricade line and enter the hazard area unless they are specifically escorted or directed by an authorized person into the area,
- ♦ Comply with all the applicable federal, state safety rules and regulations and the customer safety procedures,
- ♦ Always report any unsafe acts, incidents, or careless behavior that may result in workplace accidents to your supervisor / ASR immediately,
- ♦ Team members should use common sense when performing their assignments and must keep their work environment safe and hazard free,
- ♦ Exercise care when using shredders,
- ♦ Each ASR Team member is responsible for his / her own safety and the safety of those around them,
- ♦ Do not undertake any assignment if your performance is impaired because of drugs (prescription or illegal), alcohol or for any other reason,
- ♦ ASR's objective is zero work related Safety, Security and Environment related incidents.

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without written authorization from ASR.

7

Take Home Points – Workplace Safety

- ♦ Always follow the applicable safety procedures,
- ♦ Follow lockout / tagout procedures. They are designed to disable or de-energize equipment while maintenance or service activities are carried out. Compliance with these procedures is important to prevent workplace incidents / safety violations,
- ♦ Maintain good housekeeping practices.
- ♦ Use personal protection equipment as required and applicable – safety shoes, safety glasses, safety gloves, hard hats, fall protection equipment, etc.,
- ♦ Be proactive towards safety measure rather than being reactive,
- ♦ Remember ultimately you are responsible for your own safety and avoid that momentary lapse in attention / caution which results in most accidents / injuries,
- ♦ Ensure that you medically fit and rested for the assignment,
- ♦ Never work on an assignment if you are under the influence of drugs or alcohol which impairs your performance or could lead to safety violations,
- ♦ Exercise extreme caution and care when you encounter hazardous conditions while driving, walking or working,
- ♦ Use proper techniques when lifting, pulling or pushing heavy objects.

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without written authorization from ASR.

8

Information / Data Security Awareness

Provides a brief introduction to cybersecurity and how to maintain a secure online work environment.

Information / Data Security

Cyber attackers / criminals are relentlessly targeting information / data assets such as intellectual property, engineering designs / know-how, supplier information, trade secrets, customer lists, financial information, emails, customer account information, etc. Several well known companies - **Google, Adobe, Yahoo, Symantec, and many others have all been victims of cyber hacking!**

During your tenure with ASR, you will work with or have access to sensitive / classified / Government / proprietary commercial information. **It is your responsibility to protect this valuable asset.** Unauthorized (or unintentional) disclosure or loss of information / data could lead to grave financial and reputational loss / damage for ASR / customers / suppliers leading to negative relationships with customers. **In addition, this could result in possible civil and criminal sanctions resulting from noncompliance with national, state and federal laws!**

Information / Data Security is Everyone's Responsibility!

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without authorization from ASR.

2

Why Information / Data Security Awareness?

Information / data security is not about technology. **It is about people.** Advanced information security systems deployed to stop hackers, phishers, spies, saboteurs, and cyber criminals / attackers are often compromised by the complacency, inattention or incompetence of the users! **You can unknowingly pose information security risks in several ways:**

- ♦ Carelessness with password or use of weak passwords,
- ♦ Opening email attachments from dubious or suspicious sources,
- ♦ Not logging off from the network or the internet connection after use,
- ♦ Using wireless connections in an unsecure manner,
- ♦ Reduced emphasis on physical security resulting in loss or theft of your laptop, portable devices, mobile devices, storage devices, smart phone etc. containing valuable data and information.

It is essential that you understand the vulnerabilities of cyber space because you can unintentionally or unknowingly endanger the computer system / network of ASR / customer / supplier network with grave consequences.

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without authorization from ASR.

3

Information Security – Good Practices

Our activities involve extensive use of email, mobile devices, and computers. We need to protect our systems against cyber attacks, hacking and email misuse. When using the office / home computer or a mobile device in connection with your ASR assignments, cybersecurity procedures must be followed. Some useful tips:

- ♦ Access only those folders / systems / computers for which you are authorized,
- ♦ Don't open emails, attachments, links from unknown people / entities, or unverified email address. These may have viruses, malicious codes, trojan horses hidden in them. **Delete the emails / attachments promptly,**
- ♦ If you see suspicious messages, activity on your work computer, inform the System Administrator immediately,
- ♦ Do not attach unauthorized external devices (USBs, disk drives) to the ASR / customer computer unless you are sure of their authenticity and source and you are authorized / permitted to do so,
- ♦ Check if the antivirus SW on your computer is active and current,
- ♦ Protect your password. If you think that your password has been compromised, inform the System Administrator promptly,
- ♦ Do not install any SW / application on the ASR / customer computer unless it has been approved and authorized,
- ♦ Log off from the system when you are away from it for extended periods,
- ♦ Disconnect from the Internet when you are not using it.

COMMITMENT TO SUCCESS THROUGH EXCELLENCE

For use by ASR Field Team only. Do not duplicate or distribute without authorization from ASR.

19

ASR Training Examples (cont'd)

Supply Chain Quality Management

Provides an introduction to the importance of applying Quality Management principles to improve Supply Chain effectiveness and performance.

Introduction

- This presentation, part of **ASR Training Material – Supply Chain Quality Management Series**, provides a brief introduction to **Supply Chain Quality Management**.
- Today's supply chains have become very complex because of their dependence on global manufacturing and sourcing.
- Companies derive tremendous competitive advantage by streamlining and improving their supply chains.
- **Product quality, cost-effectiveness, on-schedule delivery, resilience, risk mitigation and cybersecurity** are key to better supply chain management.
- The word "Quality" conveys different meaning to different people. For this presentation, **Quality connotes conformance** of the product (or service) to the requirements defined by the customer and involves standards / specifications / guidelines set by the customer, Government organization/s, industry associations or some other entity.

Supply Chain Quality Management - Benefits

- Positive relationships exist between **quality management and supply chain management**. Some of the benefits of applying quality management techniques to supply chain are:
- Reduction in process and production variation which impact a supply chain's performance by **reducing cycle time** (the time between two successive replenishments), and improves on-time / schedule delivery.
 - **Reduced safety stocks** requirements (inventory required to protect against production glitches and uncertainties).
 - **Reduction in supply chain inventory** (improves cost-effectiveness).
 - **Less defective goods** moving through the supply chain save the cost and **wastage associated with transportation / warehousing / repairing or disposal of nonconforming items**.
 - **Improved delivery reliability / dependability** for the end user (increased customer satisfaction).
 - **Improved forecasting** for the supply chain's performance.
 - **Reduced production lead time - improves the supply chain's response time** for demand variations.
 - **Quality at the source reduces inspection time and cost** downstream in a supply chain
 - Focuses the supply chain / procurement / operation managers on quality and continual improvement to enhance the supply chain performance.

Quality Control (QC)

- **Quality Control (QC)** refers to processes designed to determine conformance to product and service requirements.
- **QC** consists of activities which evaluate a product / service / process in accordance with established criterion, standards, specification.
- **QC** involves carrying out measurements, visual observations, tests, data analysis, document and records review, process monitoring, raw material evaluation and comparing with the standards / standards / specifications / requirements.
- **QC** verifies that specific attribute(s) are present in the product / service.
- **QC** focuses on testing / examination to verify conformance or detect defects.

Corrective Action, Preventative Action, Root Cause Analysis

Provides an introduction and summary of the systematic approach to eliminating nonconformities

Corrective Action

- The ISO (International Organization for Standardization) ISO 9001:2008 **Quality Management System - Requirements** defines **Corrective Action** (see Clause No. 8.5.2) as "action to eliminate the causes of nonconformities in order to prevent recurrence." It is further required that "**Corrective Action** shall be appropriate to the effects of the nonconformities encountered".
- ISO 9001:2008 requires: A documented procedure shall be established to define requirements for:
 - Reviewing nonconformities (including customer complaints),
 - Determining the causes of nonconformities,
 - Evaluating the need for action to ensure that nonconformities do not recur,
 - Determining and implementing action needed,
 - Record of the results of action taken,
 - Reviewing the effectiveness of the corrective action taken,
- **Nonconformities** are deviation from the defined requirements and must be corrected / prevented in a systemic / controlled manner.

Preventive Action

- The ISO (International Organization for Standardization) ISO 9001:2008 **Quality Management System - Requirements** defines **Preventive Action** (see Clause No. 8.5.3) as "action to eliminate the causes of potential nonconformities in order to prevent their occurrence." It is further required that "**Preventive Action** shall be appropriate to the effects of the nonconformities encountered".
- ISO 9001:2008 requires: A documented procedure shall be established to define requirements for:
 - Determining potential nonconformities and their causes,
 - Evaluating the need for action to prevent occurrence of nonconformities,
 - Determining and implementing action needed,
 - Record of the results of action taken,
 - Reviewing the effectiveness of the preventive action taken.

Root Cause Analysis

- **Root Cause Analysis (RCA)** seeks to determine (for a nonconformance) what happened, why it happened and how it can be prevented in future. Its a systemic method to:
 - Investigate a nonconformance,
 - Understand the underlying causes,
 - Develop effective Corrective and Preventive Action to make the product fit for use and prevent its recurrence of the cause.
- Typically **Root Cause Analysis** Management System is based on the following steps:
 - Initiate the investigation,
 - Define the problem,
 - Data / information collection and analysis,
 - Identify causal factors,
 - Root cause identification,
 - Develop recommendation / action items,
 - Implement corrective and preventive action,
 - Follow up on effectiveness of the steps / actions taken.

Federal Supply Schedules for US Government

ASR has the following Schedules:

- ◆ **Global Business Support (GBS) – Department of Defense customers, September 2016 onwards**
Maritime Material Handling, Administrative Support and Clerical Services, Information Technology, Mechanics and Maintenance and Repair, Plant and System Operation, Engineering/Technical Support, Mobile Equipment Operation, Financial Management, Specialized Technology, Industrial Services, General Services and Support
- ◆ **Logistics Worldwide (LogWorld) Contract # GS-10F-0602P, September 2004 onwards**
System development, surveillance, audits, process improvement, acquisition support, deployment logistics and operations, QA / QC, security / safety compliance, inspection, coordination, training, warehouse management, inventory management, supply chain management
- ◆ **Professional Engineering Services (PES) Contract # GS-23F-0023K, October 1999 onwards**
GSA PES schedule includes chemical, civil, mechanical, electrical, manufacturing engineering covering a wide spectrum of specialties such as environment, safety, structures, process engineering, material management, logistics, instrumentation and controls, project management / control, procurement management, materials management, operations analysis, testing
- ◆ **Information Technology (IT) Contract # GS-35F-0092J, November 1998 onwards**
IT facility operations and maintenance, systems analysis, system development, network management, CAD, data conversion / migration, programming, testing, requirements gathering, technology insertion, data management and analysis, reporting
- ◆ **Seaport-e N00178-11-D-6453, April 2011 onwards**
Prime ID/IQ under the U.S. Navy's SEAPORT Enhanced (Seaport-e) Multiple Award Contract

Veteran Outreach Program

ASR's has implemented the Veteran Outreach Program to reach, train and bring onboard veterans. **Our aim is to help the veterans to prepare for a career.** Salient features of ASR's Outreach Program are:

- ◆ Identify and reach the veterans through career fairs, county and state agencies, networking, internet posted resume
- ◆ We offer veterans training / orientation / mentoring, to assist in their transition to civilian employment / career. **ASR has teamed with Nassau County for veteran training.** Veterans get unlimited access to ASR's Training and Orientation Portal (ASR TOP) to improve their skills
- ◆ ASR's Training and Orientation team has several veterans with extensive experience so that our training is practical and work oriented,
- ◆ State of art training facilities for class room training
- ◆ We maintain a large database of veterans who are available for deployment,
- ◆ ASR has track record of deploying veterans wherever possible – on its contracts and assignments for contingent labor in aviation, petrochemical, energy, manufacturing, marine sectors. **About 90% of our team members on the government contracts are veterans.**

Summary

- ◆ ASR provides one-stop high quality performance of our **over 30 years** of worldwide experience and expertise in **Project Management**,
- ◆ Robust processes assure each activity is **cost effectively** accomplished on schedule and in conformance with customer requirements and delivers **Best Value**,
- ◆ Over thirty years of expertise and experience in providing support to commercial and Government customers with consistent record of customer satisfaction,
- ◆ **One Stop Solution provider for Project Management, Engineering, Information Technology, Healthcare Administration, Training, Administrative and Clerical, Quality Assurance / Control, Health Facility Planning, Supply Chain Management, Warehousing Management,**
- ◆ **ASR Provides:**
 - ◆ Effective program management with experienced and technically qualified professionals and highly experienced Corporate Team,
 - ◆ Consistent service delivery using best practices and proven, state of the art processes / systems,
 - ◆ Reduced cost & reduced risks. Standardization based on robust and tested processes and procedures,
 - ◆ **Extensive expertise and experience in managing SCA covered contracts.**
